AI in untrained hands a big risk, Modi tells Gates

In chat with Microsoft co-founder, PM says it's time to redefine growth metrics

PRIME MINISTER'S OFFICE
New Delhi, 29 March

Prime Minister Narendra Modi on Friday cautioned that a powerful technology like AI in unskilled, untrained hands holds significant risk of misuse, as he advocated the need for clear 'dos and don'ts' and use of watermarks on AI-generated content to curb misinformation and deepfake-related harms to the society.

In a candid, free-wheeling chat with Microsoft co-founder and billionaire philanthropist Bill Gates, Modi spoke at length on how India has democratised technology for the benefit of its citizens, embracing the power of digital for improving lives, and excited confidence that the country will take remarkable strides in the fourth industrial revolution, that has digital in its core.

During the discussion that touched on a slew of topics, from AI to Digital Public Infrastructure, the PM said in the case of deepfakes, it is crucial to identify that a particular deepfake content is AI-generated, along with appropriate disclosures about its source.

Ching dangers of AI harms and deepfakes in a society, he said, initially deceives and misleads people before it spreads. "It is crucial to acknowledge that deepfake content is AI-generated and mention its source. These measures are important in early days. We need to establish dos and don'ts... we will need to think about it seriously," he said.

The PM talked about the significant risk of misuse when a powerful technology like AI is placed in unskilled and untrained hands. Acknowledging the importance of AI, the PM outlined how India extensively leveraged the new-age innovations during the G20 Summit. AI also helped to transcend its species in different languages, he mentioned.

In the course of his conversation, the PM asked Gates to take a selfie via Nmap app, as he demonstrated an AI-powered feature and face-recognition technology on the popular app.

Gates commended India's advancements in technology, particularly in AI

"IT IS KEY TO ACKNOWLEDGE THAT DEEPFAKE CONTENT IS AI-GENERATED AND MENTION ITS SOURCE. THESE ARE IMPORTANT IN EARLY DAYS. WE NEED TO ESTABLISH DOS AND DON'TS... WE WILL NEED TO THINK ABOUT IT SERIOUSLY."

NARENDRA MODI, PRIME MINISTER

Innovation. "India is not only adopting technology but it is actually leading it," he said, adding that the country has adopted a 'digital government'.

Gates said, "G20 really raised things like digital innovations and how the south-south collaboration can be far more than just the dialogue with the north. Our foundation is so excited about the past results that you have achieved here in India, that we would be active in trying to take that into many other countries."

In a witty take on AI, the PM said, in India, mothers are referred to "Aai" (a word that sounds similar to AI), and added that children here have become so advanced that they start using the hi-tech term very early in life.

Modi said if people use AI as "magic tool" or rely on it out of sheer laziness, say in drafting letters, it would lead to "great injustice". He said AI tools must be leveraged to enhance human efficiency and within a field of expertise. "One should

compete with AI and ChatGPT... should strive to surpass its capabilities." For technology, education and health are three sectors where he is excited about the use of technology, and highlighted related efforts of his government in these fields.

Modi said climate action had gained momentum since the G20 Summit in India last September. When Gates asked if the green approach could be made more affordable for easier adoption, Modi said the world needs to adopt a two-pronged strategy: first, nature and climate-friendly innovation, and second, environmentally-friendly lifestyles.

Modi suggested that the world adopt the concept of green GDP which would be incorporated into the overall gross domestic product. "We need to change the global terminology," he said. Green GDP is an alternative metric for gauging economic growth which takes into consideration the environmental consequences linked to economic activities.

Paddy custom milling delay disrupts delivery

RABHINA DAS
Raipur, 29 March

The delay in paddy custom milling in Chhattisgarh has disrupted rice delivery to the central and state pools.

Chhattisgarh has registered a record paddy procurement in the kharif marketing season (KMS) of 2023-24. The input surplus on paddy, which enables farmers to receive ₹3,000 per quintal with bumper yields, is reported to be the reason for this heavy flow.

Before the November 2023 Assembly elections, the BJP announced paying ₹3,100 per quintal to paddy farmers. It came to power on December 13, and the government issued the input subsidy notice on December 21 for paddy procurement at minimum support prices (MSP). As against the target of 18 million tonnes (mt), farmers have sold 14.4 mt of paddy to the state in the KMS 2023-24.

Chhattisgarh amended its policy and facilitated the rice millers to directly hit paddy from procurement centres for custom milling. The move was aimed at clearing the space after yield arrival. Currently, more than 13.5 mt of paddy has been lited by the Centre and efforts are on to transport the remaining for custom milling.

"The proportion with which the paddy was lited could not be maintained in the delivery of custom-milled rice (CMR)," a senior official in the Chhattisgarh civil supplies corporation said. About 30 per cent of CMR has been delivered against the target set for the current procurement season, he added.

After Punjab, Chhattisgarh is the largest rice contributor to the current season's central pool.

"The delay is not on the part of rice millers," said one of the mill owners. The PCI

Chhattisgarh has registered a record paddy procurement in the kharif marketing season of 2023-24

and the corporation are facing a shortage of space that has delayed the delivery of rice, he said. The government agencies are battling for space as the Indian Railways is allegedly not providing sufficient rakes to clear the existing rice stock.

The spokesperson of South East Central Railways (SECR) and FCI refused to respond. The Centre has set a target to procure 9.7 mt of rice in Chhattisgarh for the central and state pools. It has to be delivered to the central agency Food Corporation of India (FCI) and civil supplies corporation.

"The delay is not on the part of rice millers," said one of the mill owners. The PCI

UTTAR PRADESH

State aims to raise maize production

WIRENDA SINGH RAJAT
Lucknow, 29 March

With the maize basket now feeding ethanol output for mixing in petrol, Uttar Pradesh is targeting to increase the production to more than 3.2 million tonnes (mt) by 2027-28.

Currently, the state's maize production is around 2.2 million mt, and it is estimated at 2.12 mt across 830,000 hectares. The yield is pegged at nearly 25.49 quintals (100 kg) per hectare, which is lower than the national average.

The state plans to increase maize sowing by 200,000 hectares and boost production by an additional 1.1 mt. This will hike the state's maize area and production to about 1.03 million hectares (mt) and 3.2 mt, respectively. With robust maize output and downstream value chain, the government is looking to boost the state's rural economy and support its flagship trillion-dollar economy roadmap.

The Ugra Adityanathi Cabinet approved a maize development program to promote its cultivation across 75 districts by providing additional benefits to cultivators and conducting special sessions. According to a government official, the state will invest around ₹1 crore on increased maize publicity programs.

ability of the government as well as the industry to bring forward such areas on the tourism map. We will discuss this matter with the government in the vision document.

In 2023, Banswara received over 1.92 million domestic tourists and only 69 foreign tourists. While Durgapur recorded 4.08 million domestic and 231 foreign tourists in 2023. Banswara has only 203,000 domestic and 17 foreign tourists.

Promote unexplored tourist places: Industry

ANIL SHARMA
Jaipur, 29 March

Potential tourist places in Rajasthan demand from recognition for decades but have been a step to far as various organisations in the state are preparing a vision document to be submitted to the government.

Tourism accounts for around 12-14 per cent of the economy of Rajasthan. "People associated with the

hotel and tourism industry of the state have started efforts to bring such areas on the tourism map. Only after increasing the reach of tourists in such areas can the tourism sector in Rajasthan be fully developed," Chandan Banswara, said. Tribal belts of Halwar, and Pratnagarh can be turned into tourist sites

there was immense concern in the state. "Some areas are famous all over the world but some are
